Honorable Mention

Residential - Renovation Over 3,500 Square Feet

The goal of this large scale renovation was to create open space with seamless transitions between differing areas, providing a sense of comfort to fit a family; yet, still providing a level of sophistication and luxury for the clients' lifestyle of high end entertaining. The renovation included removing multiple walls, raising ceiling heights in specialty areas, a vast expansion onto the back of the home, and installing all new custom finishes, surfaces and elements throughout.
